Savvy Drive

A Pioneering Traffic Management System

Savvy Drive Solution is a centralized, web-based solution that allows Drivers and Vehicles Licensing Departments automate and streamline their different processes across the country. With a graphical and easy-to-navigate system interface; the *Savvy Drive* Solution provides the means to run a centralized and fast end-to-end services within the department, including: Drivers Licensing, Vehicles Licensing, Managing Training Centers and Ticketing Systems among others, in a more efficient and timely manner, to better serve constituents and service recipients.

The *Savvy Drive* Solution enables the department users to generate extensible reports and dashboard results to accelerate and enhance the decision making process, and provide executive-level users with the visibility levels that can help them oversee and control the overall process from a top-view angle.

The design of the solution is not only built on best-practices and based on standard processes in this area, but it also provides the ability to customize and fine tune the automated process in a way that matches the target business process.

In a nut-shell, Savvytek Savvy *Drive* Solution brings together the visibility, control, efficiency and timeliness to overall operation of Drivers and Vehicles Licensing.

Benefits

- Enhanced visibility and control over the end-to-end process
- Synchronized and faster service delivery across the different departments throughout the country
- Eliminate data inconsistency and minimize fraud through a centrally controlled and regulated process
- Enhance process efficiency and minimize human- prone errors
- Empowered and more informative decisions that are based on one version of the truth
- Comprehensive financial management and automated fees calculation
- Flexible integration with other standard-based solutions

Vehicles System

Provides management and control over the end-to-end services related to vehicles across the country, starting from first time registration, vehicle licensing, vehicle exchange, temporary licensing through vehicle re-exporting. The system provides functionalities such as:

- Vehicles Registration and License Renewal
- Vehicles Exchange Services
- Vehicles and License Detention Services
- Temporary Licenses Services
- Rent-A-Car Offices Services

Drivers System

Provides an effective and easy way to handle all procedures related to Drivers Licensing services, including First Time Driver Licensing, Drivers Tests Procedures, Drivers License Renewal, Driver's Permission Issuance procedures and Driver's License Detention

Financial System

The Financial System complements the solution by providing tools for a smooth fees-calculation and collection process across the overall operation. It provides the ability to control cashier boxes, employee bonuses and follow up on receipts and financial reports.

Training Centers System

This system provides the DVLD the ability to control and monitor Driving Training Centers across the country from one, centralized solution. The Training Centers system includes functionalities like:

- Training Centers Services
- Trainers Services
- Training Cars Services
- Tests Scheduling Services

Fines and Ticketing System

A reliable, user friendly tool that enables the different directorates of the department to centrally register and delete tickets for drivers and vehicles, in addition to controlling the Points System, and coordinating the training courses for Points Reduction purposes.

Reporting and Decision Support System

The solution comes with web-based extensible and analytical reports that facilitate timely and accurate decision making and analyses processes. The report can be generated on a tabular, text-like, or graphical format to enable visibility and control on different levels, from officers and high-rank executives. The out-of-the-Box reports cover the following:

- Services and Procedures Reports
- Administrative Reports
- Training Centers Reports
- Vehicles Reports
- Drivers Reports
- Financial Reports
